

# inxı is a full featured CLI system information tool

<https://smxi.org/docs/inxi.htm#inxı-basics>; <https://github.com/smxi/inxi>;  
<https://github.com/hamonikr/inxi-gui/blob/master/app.png>;  
<https://forum.ubuntu.ru/index.php?topic=318297>.

```
sudo dnf install inxi -y && clear
```

<https://smxi.org/docs/inxi-options.htm>

Basic inxi information

```
clear && inxi -b
```

Full output

```
clear && inxi -Fxz
```

Graphics info (devices(s), drivers, display protocol (if available), display server/Wayland compositor, resolution, X.org: renderer, OpenGL version; Xvesa: VBE info.

```
clear && inxi -Gxx
```

Audio/sound devices(s), driver, running sound servers.

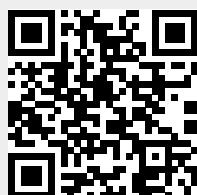

```
clear && inxi -A
```

Advanced Network device info. Triggers -N. Shows interface, speed, MAC id, state, etc.

```
clear && inxi -nz
```
